ULTRAPOLLEN™

ULTRAPOLLEN™

ANCIENT ORIGINS

Flower pollen and pollen extracts have long been used as a natural agent to support overall health and vitality as well as prostate and urinary tract health. Pollen is produced when honey bees collect nectar from the flowers of seed-bearing plants, such as cereal grasses. Flower pollen is actually a male reproductive part of flowers. This pollen when combined with an ovule, the female reproductive part of a plant, enables flowering plants to reproduce. Amazingly, the tiny grains of pollen contain essential substances that are necessary to create new life in the plant world. Some of the greatest benefits derived from flower pollen extract may stem from natural elements that are still unknown to science.

- ✓ Supports prostate and urinary tract health
- ✓ 20:1 flower pollen extract
- ✓ Non-solvent extracted
- ✓ Contains naturally occurring phytosterols
- ✓ Gluten-free
- ✓ Pure vegan and hypoallergenic

Some people call pollen the ultimate super nutrient. Pollen naturally contains a vast, life-giving array of nutrients, vitamins, amino acids, enzymes and other phytonutrients. Flower pollen extracts were first developed in Sweden and have been specifically used for more than 30 years in Europe and Asia to promote general vitality and wellness as well as prostate support. Numerous studies have proven that flower pollen is an effective tool to maintain and promote prostate and urinary tract health.

WHY USE FLOWER POLLEN?

Enjoy the amazing benefits of one of nature's most revered treasures: Flower Pollen Extract. Whether you want to experience a high quality of overall health and wellness or specifically benefit from its value in promoting prostate and urinary tract health, you'll find that Premier Research Labs UltraPollen™ is one of Nature's top "products of choice" for you and your family.

For centuries, pollen has been revered as an outstanding health support agent. UltraPollen™ has been specially formulated according to the scientific discoveries found in clinical research that was conducted on the benefits of flower pollen extract to support prostate and urinary tract function. UltraPollen™ offers a superior form of flower pollen extract, providing a 20:1 concentrate to ensure optimum potency of its nutritional constituents. Flower pollen extract naturally contains both water-soluble (hydrophilic) and fat-soluble (lipophilic) fractions. This premier quality flower pollen extract also has low allergen risk (mold and spores have been cleaned). It is collected from plants that are grown and harvested without pesticides.

Flower pollen delivers a full spectrum of naturally occurring nutrients, custom-designed by nature, that are needed by the body to maintain good health. Although we do not individually test for these components, flower pollen is a natural source for each of the 10 essential amino acids,

non-essential amino acids, antioxidants and enzymes as well as important phytosterols.

BREAKTHROUGH MANUFACTURING

The preparation of this premier rye pollen extract begins early each year by selecting a certified premium quality seed, using no herbicides or pesticides, and the appropriate amount of acreage to grow it. At the optimal time for each pollen type, the pollen is then harvested with patented, custom-designed equipment. It then moves through a proprietary process consisting of a tightly controlled series of steps that separates the pollen from the plant material. Yearly differences in the properties of the pollen, such as moisture and pollen density, require careful adjustments in the processing to achieve optimal standardization.

COMMITTED TO QUALITY, CONSISTENCY AND SAFETY

Our commitment to safety for both our customers and the environment has led us to deliver a non-solvent extracted flower pollen using environmentally-friendly CO₂ and H₂O extraction methods. Through rigorous manufacturing and quality control standards, PRL strives to deliver a highly consistent quality product that contains premier quality pollen, has low allergen risk, is gluten-free and is manufactured without added undesirable excipients such as magnesium stearate or talcum powder.

INGREDIENTS

Each Vegetarian Capsule Provides:

Flower Pollen Extract	272 mg
Other Ingredients: Stabilized Rice Bran, Vegetable Cellulose Capsule	

Suggested Use. Take 1 capsule, 3 times daily or as directed by a health professional.

Code: 2485 (45 vegetarian caps/bottle)
